

In the Name of God

In memory of the victims of fundamentalism

A crucifix opposing Christian fundamentalists' crusade against contraception and sexual education, a policy with disastrous consequences for the AIDS situation in Africa and elsewhere in the world.

A crucifix that does not take a stance to abortion or stem cell research, but defends women's liberation and right to own body.

A crucifix advocating for a humane interpretation of the Bible and respecting the humanitarian aid carried out by Christian organisations all over the world.

A crucifix created by Danish sculptor Jens Galschiot. It will be put up simultaneously at various sites to fan a global debate about the right to contraception and unprejudiced sexual education based on science and not on religious dogmas.

We need helpers and co-operators around the world, contact aidoh@aidoh.dk or see
